4. Were tamper-evident seals affixed to all journal tape canisters?  Yes  No

7. Were there any differences between the machine results and hand-counted results for any audited machine?  Yes  No *(\*If yes, please attach copies of the hand count logs for the applicable canisters)*

*The hand review of the receipt tape from one machine indicated that a single ballot cast on that machine had not been counted with the results. The issue was resolved after reviewing the machine logs and determining that the ballot had not in fact been cast as the voter had damaged the machine before it could be cast, and had then been permitted to cast a ballot on another machine. The number of ballots cast does in fact match the number of ballots counted. Hand count documentation is attached.*

## Ballot Envelope Signature audit Summary

Total number of signature affidavits audited: 974

Did the signature audit reveal any inconsistencies between a signature's initial verification and the audit?  Yes  No *(\*If YES, please attach an explanation of any inconsistencies)*
