

To support the transition to CareATC, the clinic will be closed during July. This temporary closure will allow time for the transfer of equipment and supplies, facility deep cleaning, necessary repairs or minor renovations, and staff training on new systems.

During the closure, members will have access to CareATC's 24/7 virtual care and telehealth services. In addition, Dr. Sheehan or a covering physician will remain available to help ensure continuity of essential services, such as prescription refills.
